

Front End

As front end framework/library we are using [ReactJs](#).

You can check out the [about](#) page for a list of the **third party projects** being used.

Global variables

The global variables can be found at `variables.css` . You can import it into your stylesheet using

CSS

```
@import url(./variables.css);
```

Component architecture

flowchart TD

```
App --> MainPage
App --> ExperimentPage
MainPage --> SideBar
SideBar --> Header
MainPage --> Content
Content --> Inicio
Content --> Calibrar
Content --> Controlar
Content --> Config.
Content --> Sobre
```
