Front End

As front end framework/library we are using ReactJs.

You can check out the about page for a list of the **third party projects** being used.

Global variables

The global variables can be found at `variables.css` . You can import it into your stylesheet using

CSS

```css
@import url(./variables.css);
```

Component architecture

```
flowchart TD
    App --> MainPage
    App --> ExperimentPage
    MainPage --> SideBar
    SideBar --> Header
    MainPage --> Content
    Content --> Início
    Content --> Calibrar
    Content --> Controlar
    Content --> Config.
    Content --> Sobre
```
